Subject: Regional Medical Center of San Jose – Termination of Labor & Delivery Services

The Emergency Medical Services Agency has been notified by Regional Medical Center San Jose that it will no longer be providing inpatient labor and delivery services at the hospital as of **May 30, 2020**.

Due to the announcement, EMS Policy 602 “911 EMS Patient Destination” has been revised to reflect those service changes. A copy of the revised policy has been attached to this memorandum. Please distribute to all appropriate personnel.

If you should have any questions or concerns, please direct those to jackie.lowther@ems.sccgov.org.

Attachment

- Revised Policy 602: 911 EMS Patient Destination, effective May 31, 2020

911 EMS PATIENT DESTINATION

Effective: May 31, 2020
Replaces: April 27, 2017
Review: May 31, 2023

I. Purpose

The purpose of this policy is to ensure that all patients who require emergency ambulance service are transported to the approved facility most appropriate for their emergency medical condition.

II. Patient's Choice

- A. Patients shall be transported to their facility of choice if the requested facility meets the requirements of this policy and regardless of their ability to pay.
- B. During times of EMS System surge, patients may be assigned to hospital destinations and may not be able to select a specific destination. Examples of EMS System surge include, but are not limited to, multiple patient events (Multiple Casualty Incident Plan), activation of County Routing, states of local emergency, etc.

III. Routine Patient Destination

- A. The routine patient destination is a basic or comprehensive emergency department in an acute care hospital or the emergency department of a federally owned and operated hospital as identified in *Table B: Approved In-County Services*.
- B. Patients are to be transported to a routine patient destination unless the patient meets the "In-Extremis", "Specialty Care", or "Special Circumstances" patient destination criteria identified in this policy.
- C. If no patient preference, routine patients shall be transported to:
 - 1. The closest hospital to the incident location as determined by the total emergency ambulance transport time; **and**,
 - 2. That is accepting emergency ambulance patients as is identified in *Table B: Approved In-County Services*.

IV. In-Extremis Patient Destination

- A. A patient that is determined to be "In-Extremis" presents with a condition that benefits most from immediate emergency ambulance transportation to the closest hospital.

- B. An In-Extremis patient is defined as a patient that presents with one or more of the following:
 - 1. A breech presentation or protruding limb during a delivery.
 - 2. A visible external bleed that cannot be controlled by EMS personnel where significant blood loss continues to occur despite the use of direct pressure and/or application of a tourniquet.
 - 3. The inability to be ventilated adequately following the use of appropriate basic and advanced airway adjuncts and procedures.
- C. In-Extremis patients shall be transported to the hospital that is:
 - 1. The closest to the incident location as determined by total emergency ambulance transport time; **and**,
 - 2. That is **not** on internal disaster.

V. Specialty Care Destination

- A. In some circumstances, the most appropriate facility is one that offers specialized services based on the EMS providers primary impression of the patient's condition and based on the criteria of this policy.
- B. The "most appropriate hospital" for specialty care patients is the hospital that is:
 - 1. The closest to the incident location as determined by total emergency ambulance transport time; **and**,
 - 2. Is designated to provide the specialty service desired; **and**,
 - 3. Is accepting emergency ambulance patients.
- C. **Trauma Patients** – A patient that is categorized as a "Major Trauma Victim" (MTV) according to *Santa Clara County Prehospital Care Policy 605: Prehospital Trauma Triage*.
 - 1. Trauma patients that do not meet Major Trauma Victim (MTV) criteria shall be transported to a destination prescribed by Section III: Routine Patient Destination.
 - 2. MTVs shall be transported to a Trauma Center identified in *Table B: Approved Services* and shall adhere to the catchment areas that have been established in *Santa Clara County Prehospital Care Policy #602: Schedule A; Trauma Center Service Areas*.
 - 3. In addition to the provisions of *Santa Clara County Prehospital Care Policy #603: Hospital Bypass*, if **all** Trauma Centers are not accepting emergency ambulance patients, the patient shall be transported to the:

- a. Closest emergency department to the incident location as determined by total emergency ambulance transport time; **and**,
 - b. That is accepting emergency ambulance patients.
4. A pediatric patient (under 15 years old) who meets Major Trauma Victim (MTV) criteria as described in *Santa Clara County Prehospital Care Policy #605: Prehospital Trauma Triage*, shall be transported to:
- a. The closest Pediatric Trauma Center, as identified in *Table B: Approved In-County Services*, to the incident location as determined by total emergency ambulance transport time; **and**,
 - b. That is accepting emergency ambulance patients.
5. A pregnant patient beyond 20 weeks gestation who meets Major Trauma Victim (MTV) criteria as described in *Santa Clara County Prehospital Care Policy #605: Prehospital Trauma Triage*, shall be transported to:
- a. The closest Labor and Delivery Center that is also a Trauma Center, as identified in *Table B: Approved In-County Services*, to the incident location as determined by total emergency ambulance transport time; **and**,
 - b. That is accepting emergency ambulance patients.

D. Psychiatric Patients

- 1. Psychiatric patients shall be transported to a facility equipped to provide appropriate care. Psychiatric patients in need of medical evaluation shall be transported to the facilities identified in *Table B: Approved In-County Services*.
- 2. Patients who require psychiatric care shall be transported to an appropriate facility in accordance with their medical needs as a priority. The receiving facility may transfer the patient to a psychiatric facility after stabilization.
- 3. Patients with no medical complaint may be transported to the destination established by the law enforcement agency responsible for executing the 5150 hold.

E. Burn Patients – Patients meeting major burn criteria as per *Santa Clara County Prehospital Care Policy #605: Prehospital Trauma Triage* shall be transported to the burn center at Santa Clara Valley Medical Center (VMC) via the Trauma Center.

- 1. If Santa Clara Valley Medical Center (VMC) Trauma Center is not accepting emergency ambulance patients, the patient meeting major burn criteria shall be transported to:

- a. The closest trauma center identified in *Table B: Approved In-County Services* to the incident location by the total emergency ambulance transport time; **and**,
 - b. That is accepting emergency ambulance patients.
2. Patients meeting major burn criteria and having additional concurrent trauma, and if the traumatic injuries poses the greater risk of morbidity or mortality, shall be transported to:
- a. The closest trauma center identified in *Table B: Approved In-County Services* to the incident location by the total emergency ambulance transport time; **and**,
 - b. That is accepting emergency ambulance patients.

F. Stroke Alert Patients

1. Patients that are identified as meeting Comprehensive Stroke Alert Criteria according to *Santa Clara County Prehospital Care Policy #700-A13: Stroke* shall be transported to:
- a. The closest Comprehensive Stroke Center identified in *Table B: Approved In-County Services* to the incident location as determined by total emergency ambulance transport time; **and**,
 - b. That is accepting emergency ambulance patients that meet stroke alert criteria.
2. Patients that are identified as meeting Primary Stroke Alert Criteria according to *Santa Clara County Prehospital Care Policy #700-A13: Stroke* shall be transported to:
- a. The closest Primary Stroke Center identified in *Table B: Approved In-County Services* to the incident location as determined by total emergency ambulance transport time; **and**,
 - b. That is accepting emergency ambulance patients that meet stroke alert criteria.

G. STEMI Alert Patients – Patients that are identified as meeting STEMI Alert Criteria according to *Santa Clara County Prehospital Care Policy #700-A08: Chest Pain - Suspected Cardiac Ischemia* shall be transported to:

- 1. The closest STEMI Receiving Center identified in *Table B: Approved In-County Services* to the incident location as determined by total emergency ambulance transport time; **and**,
- 2. That is accepting emergency ambulance patients that meet STEMI Alert.

H. **ROSC (Return Of Spontaneous Circulation)** – Adult Patients achieving ROSC of cardiac etiology according to *Santa Clara County Prehospital Care Policy #700-A07: Cardiac Arrest* shall be transported to:

1. The closest STEMI Receiving Center identified in *Table B: Approved In-County Services* to the incident location as determined by total emergency ambulance transport time; **and**,
2. That is accepting emergency ambulance patients that meet ROSC criteria.

VI. Special Circumstances

A. In some situations, special circumstances may have a direct relation to the selection of the most appropriate transport destination. Within this section, “County” shall mean the EMS Duty Chief, EMS Agency, County Medical-Health Branch or any other position or function designated by the EMS Agency.

B. EMS System Surge / Multiple Patients Events

1. When Central Patient Routing is in effect, all patient destination assignments will be directed by the County through County Communications.
2. Patients may be transported to acute care hospitals out of the county only when directed by the County.
3. If out of county mutual aid ambulance are being used in the Santa Clara County Operational Area, unless directed by the County, all transports will occur in accordance with the destinations prescribed in this policy.
4. When authorized and as directed by the County, patients may be transported to Alternate Care Sites (ACS), Field Treatment Sites (FTS), or Mobile Field Hospitals (MFH).

C. **Base Hospital Directed Destination** – Patients may be transported to any in-county destination authorized within this policy when directed by the Base Hospital.

D. **EMS Air Resource Destination** – Patient destination shall be determined by the ground crew and provided to the air crew.

1. If the pilot believes that flight to the selected destination is unsafe, the flight crew will advise the ground crew and a destination will be determined collaboratively and according to the direction provided in this policy.
2. When a ground crew is not present or if the ground crew is not designated EMS providers, the flight crew shall determine destination based on this policy.

E. Transport to out of county Hospitals from Santa Clara County

1. Patients may be transported to out of county hospitals only when permitted by this policy.
2. Santa Clara County prehospital care personnel shall determine and honor out of county 911 ambulance diversion statuses prior to beginning transport.
3. Santa Clara County prehospital care personnel shall notify the out of county hospital of their pending arrival.

F. Destination Changes While Transporting

1. A patient may change their requested destination at any time if the ambulance has not arrived on hospital property and the requested destination meets the requirements of this policy.
2. If the ambulance has arrived on the property of an acute care hospital, patient care shall be transferred to the staff of such hospital.
3. If en route to a hospital, the patient wishes to leave the ambulance, EMS personnel shall:
 - a. Attempt to convince the patient to continue to the selected destination or to the closest emergency department able to receive emergency ambulance patients.
 - b. If the patient continues to wish to leave the ambulance, stop the ambulance as soon as it is safe to do so and permit the patient to leave once in a safe location and then immediately notify their communications center.
 - c. EMS providers will make efforts to keep patient safe and out of harm's way, consistent with *Santa Clara County Prehospital Care Policy #618: EMS Life Safety Procedures*.

G. Custodial Patients from the County Jails

1. The preferred destination for patients that are in custody and are from incidents occurring in the County Jail (San Jose), Elmwood (Milpitas), and Juvenile Hall (San Jose), is Santa Clara Valley Medical Center, if the transport is consistent with the directives contained in this policy. For example, the hospital must be accepting emergency ambulance patients. The destination is determined by jail staff, not the patient.
2. From time to time the EMS Agency will issue specific transport policies related to ambulance transport of high risk/high profile inmates. These policies will augment the direction provided within this policy.

- H. **Incidents Occurring at Acute Care Hospitals** – If an acute care hospital is the incident location, patients shall be transported to the emergency department of the incident location hospital, except:
1. When the acute care hospital is not accepting emergency ambulance patients.
 2. When multiple patients require transport, and must be distributed to multiple acute care hospitals.
 3. When the acute care hospital requests a 911 emergency ambulance response to transport patient in accordance with Santa Clara County Prehospital Care Policy #620: Interfacility Transfer-Ground Ambulance.
- I. **Veterans** – Patients that are veterans may be transported to the Palo Alto Veterans Administration Hospital (PAV) if:
1. Requested by the patient; **and**,
 2. If transport is consistent with the directives contained within this policy.
- J. **Ventricular Assist Devices (VAD)** - VAD centers in Santa Clara County are located at Kaiser Santa Clara Hospital and Stanford University Hospital.
1. If a VAD patient presents with stroke symptoms, these two stroke/VAD centers would be the preferred destinations.
 2. A VAD patient visiting from outside of the Santa Clara County area should be transported to either one of these two VAD centers for device-related problems.
 3. In traumatic injury of a VAD patient consider a trauma center as a destination since the patient will be anticoagulated.
